

Press release

KANEMATSU CORPORATION

Kanematsu Chemical acquires certification under ISCC PLUS, an international certification system for sustainable products

Kanematsu Chemicals Corporation (hereinafter Kanematsu Chemicals,) a group company of Kanematsu Corporation, is pleased to announce that it has acquired ISCC PLUS certification, one of the international certification systems for sustainable products, at its Tokyo headquarters.

International Sustainability and Carbon Certification (ISCC) is a certification scheme for products that are manufactured from materials, such as biomass and recycled materials, allocated using the mass balance method (*1). It guarantees that the certified product is both sustainable and traceable, and that appropriate management is conducted along the supply chain.

The acquisition of ISCC PLUS certification will allow Kanematsu Chemicals to handle ISCC-certified biofuels and biomaterials. In accordance with the latest ISCC regulations, Kanematsu Chemicals will comply with ISCC PLUS requirements and will conduct appropriate management to ensure that products are not double-counted within the scope of other sustainability certification schemes or ISCC PLUS certification.

(*1) A method whereby when materials with different characteristics are mixed, a specific characteristic of one of those materials is allocated to part of the manufactured product according to the input volume of the material having that specific characteristic.

Kanematsu Chemical, as a trading company specializing in chemical products, is committed to working toward "sustainable social change," "transparency in manufacturing processes," and "efforts toward a decarbonized society" through the provision of "chemical products," which are essential raw materials in a variety of fields. Kanematsu Chemical also pledge and declare its commitment to comply with ISCC PLUS requirements.
